PROFESSIONAL SUMMARY

Engineering Manager & Architect with 15+ years of experience, including 8+ years at PayPal driving technical excellence in high-scale fintech environments. Proven track record in people management and leading high-performance teams while remaining deeply hands-on. Experience influencing product strategy, driving team growth, and building reliable infrastructure for global operations. Passionate about technical mentorship, code quality, and fostering engineering culture.

WORK EXPERIENCE

PayPal | Engineering Manager 2024 - PRESENT

- Lead a cross-functional team of 6 engineers (Frontend, Backend, Support) building PayPal's experimentation platform and AI-powered sales prospecting tools
- Foster high-performance team culture through mentorship, career development, and regular feedback
- Collaborate with Product Managers and stakeholders to influence product strategy and align engineering roadmap with company objectives
- Drive execution and technical excellence across roadmap initiatives
- Led end-to-end UI/UX redesign of experimentation platform, improving usability and visual consistency
- Introduced AI capabilities to internal lead generation tools used by global sales teams

PayPal | Senior Staff Engineer 2021 - 2024

- Led technical design docs and conducted thorough code reviews across the team
- Architected and developed a cloud-native third-party data integration platform using microservices architecture, ensuring scalability and resilience
- Owned CI/CD pipelines and infrastructure as team DevOps lead
- Introduced streamlined dev lifecycle processes and sprint execution standards
- Contributed to feature planning and documentation of the experimentation platform

PayPal | Fullstack Engineer 2018 - 2021

- Built internal web tools for big data teams
- Created and maintained an internal React UI library
- Helped create and maintain the default PayPal template for React applications

Neura | Frontend Engineer 2015 - 2017

- Lead frontend developer for all company-facing platforms
- Built data visualization dashboards and mentored interns

Everything.me | Frontend Engineer 2012 - 2015

- Developed internal tools, blogs, CMS, and test automation frameworks
- Created the open-source Android test automation tool Magneto
- Led development of Firefox OS Notes app with Evernote API integration

SKILLS

Leadership & Management:

Team Building, People Management, Strategic Planning, Performance Management, Cross-functional Leadership, Team Growth, High-Performance Teams

Communication:

Technical Presentations, Code Reviews, Cross-team Collaboration, Stakeholder Management

Problem Solving:

System Architecture, Process Optimization, Decision Making, Technical Design

Innovation & Strategy:

Process Improvement, Tool Development, Best Practices, Product Strategy

Project Management:

Agile Methodologies, Sprint Planning, Roadmap Execution

TECHNICAL SKILLS

Languages:

Node.js, Go, Python, PHP, JavaScript, HTML, CSS, GraphQL

Frameworks:

React.js, AngularJS

Databases:

PostgreSQL, MySQL, MongoDB, Cassandra

DevOps/Infra:

AWS, GCP, Jenkins, ArgoCD, Harness, Docker, CI/CD
